Part II: Comment Section

13. Please comment on the instructional strengths of the instructor, particularly for questions above which you rated as good or very good. (950 character limit)

Comments: Overall (17)

Excellent at making coursework accessible and engaging, asks for feedback and actually implements changes if needed. Fair marker, with great explanations on why you are given that grade.

GOOD

Good

Good instructor

He does a great job at showing you material that will help you code. He also provides a good approach to teaching all his students.

He gives us lots of additional content and practice to help better our understanding. He also makes class fun and explains certain topics in easy to understand ways. The teacher also gives up lots of free resources which is super nice and also helpful for further building our knowledge of the course content after the semester - because he genuinely makes me want to continue learning these topics once I am no longer in his class.

He is literally a very good professor. I can easily learn everything that he teach in classes and rarely need to revise anything.

He is overall very good

He is very knowledgeable in the course content and understands the life of a student. He offers many options for additional learning and allows us to use tools during projects and exams.

I believe professor Rajabi has done a commendable job in teaching CIS 145 course. Being a student who did not use to understand HTML and CSS despite learning that in my high school, I now like HTML and CSS, part of it being because I now understand what to code and professor Rajabi has always been a great help in assisting students with their queries.

Overall, I am satisfied with my learnings of this course along with my decision to take him as my instructor for this course.

No doubt, He has a great knowledge of his course and is able to deliver to his students in a good way which is a good thing to score good in exams.

Perfect

Very clear teaching of brand new concepts, good examples given, and answers questions well when they come up. I only had to email the instructor once and got a very prompt and kind response.

13. Please comment on the instructional strengths of the instructor, particularly for questions above which you rated as good or very good. (950 character limit)

Comments: Overall (17)

Very enthusiastic and keeps classes entertaining.

Very good

Very good at making the material approachable for all skill levels. He is always willing to answer questions, treating them all seriously, no matter if the answer is obvious or not. He truly embodies the idea of 'no dumb questions'.

very good ant engaging withthe class and helping people understand

14. What suggestions for instructional improvement can you make to the instructor, particularly for the questions above which you rated fair, poor, or very poor? (950 character limit)

Comments: Overall (15)

Details on quiz's weren't the clearest. Overly harsh on peneltys for small submission errors. Grading should focus more on demonstrating understanding of course content.

He tends to go on a lot of tangents during lessons, and sometimes rushes through the materials. He began the course by making us students create his course schedule - which I disagreed with immensely. As a student, I have expectations of my teachers, just the same as teachers have expectations of us students. And one of the things I expect a teacher to have finished and figured out is the syllabus, grading rubric, and schedule before classes begin. In addition to classes, I work full time and have a social life; I want to be able to plan my schooling around that and the easiest way to do that is for teachers to be ready to start their class with schedules worked out.

I am attending online classes in the first semester but was willing if I can learn from him in person as he teaches well .

I would say he is good in teaching but sometimes it becomes difficult for students to understand all file submission protocols on various sites and servers. Therefore, I will suggest he should make it simple and do not complicate it with too much things.

My only suggestions would be to talk a bit slower/wait a moment or two before switching slides. Just give a few moments for the students to absorb the information given.

N/A

No improvements Perfect from all aspects

Nothing

OVERALL GOOD

Some things were not shown, even though it may be simple for some, I have struggled with. An example is I have no idea how to see a second screen of the material that I was coding in real-time as he shows in his lectures.

The teacher sometimes tends to instruct a tad bit too fast and we don't get long enough to fully grasp certain parts of subject matter in the kecture itself. He makes up for this by giving us other tools to better our understanding, but the speed can sometimes make trying to grasp new/difficult subjects a bit disheartening.

To be more specific things coming for exam or tests

his marking scheme is to harsh thats all really

non

14. What suggestions for instructional improvement can you make to the instructor, particularly for the questions above which you rated fair, poor, or very poor? (950 character limit)

Comments: Overall (15)

sometimesd he gets off track during the zoom calls and can blab about nothing which can waste time and we lose interest

15. Additional Comments (950 character limit):

Comments: Overall (9)

A lot of the assignments are web based screenshot submissions. They don't allow much for feedback (via comments for grades) on the work being done, just pass/fail.

Best teacher I've had in a while. Before this class I had no interest in the topic, but Parsa makes it so interesting and engaging that I am happy to be in his class.

I did not like that the professor had a seperate webpage for the syllabus, other course information like lab/project instructions, lecture notes, etc. Just keep it in blackboard, why complicate things?

In the end, he is a good teacher.

NOTHING

Nice

Parsa is an amazing teacher. I was dreading taking this class since computers are not my forte, but he has made the material very accesible. Not only does he make the material easy to absorb, he also makes the lessons engaging. It is clear that he has a passion for the subject and enjoys teaching it to others. He wants the students to enjoy the subject matter, so he teaches accordingly. I would 100% recommend him as a teacher.

The course is very good

This teacher is very good at his job and his class is one of the ones I have the most fun in. He genuinley makes me look forward to doing my homework, which I greatly appreciate.
