Comments

He's a great professor. Love that he takes student's feedback on preferred delivery method and even on what we want to do for the finals. Very few professors actually care about what the students want so this is nice for once.

The instructor makes the class interesting as well as making it easy to follow. Assignments are fair and easy, and they are marked very fairly as well. Everything is made very clear and is very easy to follow.

He is good.

Essential class in my opinion.
