

Parsa Rajabi – CPSC 2350 – M01 – March 02, 2024
(Respondents: 23/35)

Comments:
He is a good instructor who has a good understanding of his students' needs.
Had trouble studying for the midterm.
The instructor is very knowledgeable and let everything that he does is for a reason it is very interactive course.
Parsa is a very engaging professor who always tries to view everything from the student's perspective and whose assignments always deepen your understanding of the materials. However, this course is easily one of the heaviest courses I've taken and sometimes Parsa could explain the concepts a bit slower.
Overall class time is productive, and structure of teaching is better than most classes.
Instructor Parsa is a motivated instructor, the only bad side of taking his course is that the workload is too heavy for this course.
He is good in general and cares about the student.
I love the way this course is being taught. Pretty flexible and everything is in our hands.
His way of teaching is interesting.
